

ABOUT UBCAST

Founded in 2007 and based in Paris, UbiCast is the European leader in Rich Media video content creation and sharing solutions. UbiCast enables users to create, train, teach and use video to communicate with a range of intuitive and automated solutions.

UbiCast trusts Authôt and intends to integrate its solution in order to offer video transcription and subtitling to its customers.

Jean-Marie COGNET
UbiCast CEO

CHALLENGES

Searching partners: UbiCast was actively looking for speech to text solutions to integrate into its video platform.

Meet emerging needs: UbiCast's customers have encouraged them to offer a quality transcription service.

Ensure full transparency: UbiCast works particularly with universities. They want video hosting and transcription services to be integrated directly into the online learning platform (e. g. Moodle), without any specific mention being made.

WITH AUTHÔT

The **meeting** with Authôt happened after a **benchmark** of the best **speech to text** solutions

"The Authôt team is friendly and pleasant. Their system is the best performing of all the ones we've ever tested!"
